

FORM A: Request to administer medication

Parent/guardian information

Please read this information carefully prior to completing the consent form.

All medication to be administered (given) to your child by school staff must be medically authorised by your child's registered health practitioner.

Medication includes:

- Over-the-counter medicines – can be purchased from supermarkets, health food stores or on-line retailers. Examples include paracetamol, ibuprofen, antihistamines, alternative medicines, supplements, vitamins, etc.
- Pharmacy medicines – can only be purchased from a pharmacy. Examples include cough and cold medicines, heart burn
- Pharmacist only medicines – can only be purchased from a pharmacy after speaking with the pharmacist. Examples include asthma inhalers, EpiPens, mild steroid creams, glucagon (hypokit),
- Prescription only medicines - can only be purchased from a pharmacy with a valid prescription from a treating health practitioner.
- Controlled drugs – such as Methylphenidate (*Ritalin, Artige, Concerta*), Dexamfetamine sulfate (*Aspen, Sigma*), Lisdexamfetamine (*Vyvanse*), opioid pain medication, etc.

The [Request to administer medication form](#) must be completed by a parent/legal guardian for all school administered medication. The parent/legal guardian must provide an updated form for any changes to your child's medication requirements. This includes ceasing medication.

The first dose of a new medication should not be administered at school, due to the potential dangers of an adverse reaction.

Medical authorisation is provided via the pharmacy label which will include the name of your child's registered health practitioner, who prescribed the medication for use. The pharmacy label should also detail when and how the medication is to be administered.

All medication must be received in its original or pharmacy packaging with the pharmacy label attached to the original/pharmacy packaging. Medication must be in the most recently dispensed, original/pharmacy packaging. Refilled, previously dispensed packaging, will not be accepted by the school.

If your child takes a medicine that requires cutting of a tablet, the tablet must be pre-cut and packaged by a pharmacist (in a Webster-Pak or similar) prior to providing the medicine to the school.

Medication held by the school, that is no longer required for your child or is unused at the end of the school year, must be collected by a parent/guardian as soon as possible. Medication cannot be sent home with your child. If a parent/guardian is unable to collect the medication within a reasonable time, it will be taken to a local pharmacy.

Additional written instruction

If your child has been prescribed medication that is to be administered on an 'as needed' basis, additional written instruction from your child's registered health practitioner will be required to ensure safe medication administration.

Additional written instructions are to be provided in the form of an Asthma Action Plan and/or, an Anaphylaxis Action Plan and/or, a medication order for insulin with a diabetes management plan and/or, a completed BCE [Medication Administration Instructions form](#). A [Medication Administration Instruction](#) form will also be required where there is insufficient information on the pharmacy label and/or associated action/management plans to enable safe administration of medication, such as changes to dose, time of administration, signs/symptoms to indicate the need for medication administration etc. All medications you provide for the school to administer to your child must be prescribed by a qualified health professional who is authorised to prescribe medications.

Health conditions requiring additional support

Students with health conditions that require the administration of emergency medication or health support other than or in addition to medication, will require an *individual health support plan*. The school will work together with you and your child's registered health practitioner to prepare the relevant health support plan. These plans ensure your child has the appropriate health support/s in place at school for their health condition.

FORM A: Request to administer medication

This form must be completed by the parent/legal guardian for all medications, including over the counter medication or alternative or supplementary medicines, to authorise administration of prescribed medicine to a student during school hours.

I _____ (Name of Parent/Legal guardian) request administration of the below medication to my child by delegated school staff.
